# Managing Cancer in Older Patients

Thursday 25<sup>th</sup> January 2024

**Venue and Time:**

12.00 to 14.00 via Vimeo

**Suitable for:**

All healthcare professionals involved in the care of older patients with cancer.

**Webinar Information:**

Advancing age is one of the most important risk factor for cancer and also frailty. Older adults with cancer are a heterogenous group, with half experiencing a degree of frailty. This webinar will cover all important considerations when looking after older patients with cancer, including interventions to optimise and support these patients and their families.
